JOANNA BIERNAT

Full-stack Developer (Angular/.NET)

Web developer with 4 years of commercial frontend experience, especially in Angular. Passionate about building robust, scalable, and well-structured applications - both on the front and back end. Recently built and deployed a full-stack app, expanding my backend skills and architectural thinking. Focused on clean code, performance, and long-term maintainability. You can view my portfolio via the link on the left or by scanning the QR code on the right. ⟶

Attention to details
Critical thinking
Fast Learner

Experience

● **Frontend Developer**
Bonus Systems Polska S.A., Warszawa   Sep 2021 - present

- Developing and maintaining benefit-related and internal ERP applications using Angular 16, AngularJS, and Material UI, with additional support from Nebular and Bootstrap.
- Participating in legacy system migration (AngularJS → Angular v16) and enhancing front-end architecture.
- Collaborating with back-end teams (Symfony, Python, PostgreSQL) to integrate REST APIs and business logic.
- Supporting, maintaining, and debugging web applications.
- Creating and updating documentation.
- Designing and building application front-ends from scratch with a focus on appealing visual design.
- Developing scalable and reusable UI components with an emphasis on code readability, modularity, and maintainability.
- Contributing to UI/UX consistency across platforms, and supporting accessibility and responsive design best practices.
- Working in an Agile team using RedMine for task and sprint management.
- Participating in business meetings and requirement discussions with high-profile clients (e.g., banking sector).
- Assisting in onboarding a new front-end developer by sharing domain knowledge and coding standards.
