JOANNA BIERNAT

Full-stack Developer (Angular/.NET)

Angular Developer with 4+ years of commercial experience, focused on building scalable, maintainable and well-structured applications. Specialized in front-end development with good understanding of backend architecture. Recently developed and deployed a full-stack application, extending my backend skills and system design capabilities. I prioritise clean code, performance, and long-term maintainability.

Experience

Frontend Developer
Bonus Systems Polska S.A., Warszawa   Sep 2021 - present

- Creating and developing financial, benefit-related and internal ERP applications using Angular framework.
- Participating in legacy system migration (AngularJS → Angular v16) and enhancing front-end architecture.
- Collaborating with back-end teams to integrate REST API and business logic.
- Implementation of UI components according to UX/UI designs (Figma, Adobe XD).
- Maintaining and refactoring existing code in line with best practices (DRY, SOLID).

- Writing unit and integration tests (e.g. Jasmine, Karma).
- Application performance optimization and error analysis (debugging, monitoring).
- Contributing to UI/UX consistency across platforms, supporting web accessibility and responsive design best practices.
- Working in an Agile team using RedMine for task and sprint management.
- Participating in business meetings and requirement discussions with high-profile clients (e.g., banking sector).
- Assisting in onboarding a new front-end developer by sharing domain knowledge and coding standards.
- Creating and updating documentation.
- Caring of code quality – participating in code reviews, using linters and CI/CD.

Office Assistant
Orbico Sp. z o.o., Poznań   Dec 2019 - Sep 2020
